Issue 1

Industry standards for contracts will significantly reduce costs and cycle time.

Issue 2

Contract risk elements – liability, indemnification, warranty, and insurance are highly contentious.

Issue 3

A well defined project scope is critical to the contract and a successful project.

Issue 4

Clarity of roles and an effective communication structure will reduce project costs.

Issue 5

Lobbying for change to the Builders' Lien Act can reduce project costs for the heavy construction industry.
